PATCO
PERFORMANCE ENGINEERED TAPES

5030

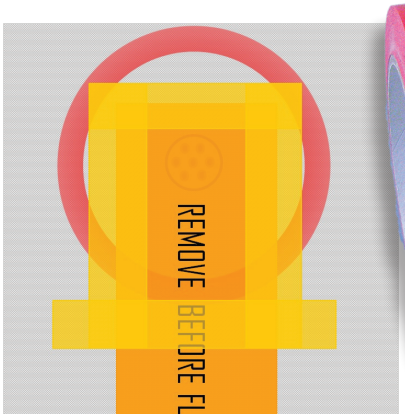

High Visibility, Residue-Free Static Port Protection Tape

Protecting static ports during routine maintenance and repair is critical, therefore choosing a reliable tape that withstands the rigors of maintenance while still removing cleanly from surfaces is also critical.

New Patco 5030 offer is high visibility, moisture and solvent resistant, and clean removal even up to 28 days of outdoor UV exposure. Ideal for static port protection, 5030 performs in other critical aerospace maintenance uses including:

- Temporary indoor or outdoor surface protection
- Color coding and parts marking
- Temporary holding and sealing
- Attachment and splicing of masking materials

Apply with a squeegee for best results!

Feature	Benefit
Polyethylene Film Backing	Conformable for irregular surfaces Withstands outdoor exposure High visibility colors
Acrylic Adhesive	Resistant to citrus-based cleaners Solvent resistant, holds up to powerwashing UV Resistant - clean removal up to 28 days Firm bond with virtually no edge bleed Excellent high and low temperature performance
